

# Chartify

Wallboard solution  
for the visualisation of a  
wide variety of data

## Advantages for you

- Provide general and target group-oriented information
- Visualise a wide range of data such as call centre KPIs, or sales figures in real time
- Motivate your employees and promote their cooperation
- Manage crisis situations with recommendations for action
- Anchor your company philosophy in the minds of your employees

With Chartify you maintain visual control for different types of data presentations.

Chartify is an application for real-time data visualization – allowing you to enrich wallboards, information screens for employees or monitors in waiting areas with eye-catching animations.

The system provides visualisation plug-ins that can display numerical data, the time, current messages (scrollbar), media files and more than 10 different chart types.

Different data sources such as SQL databases, contact centre applications like Mitel MiCC Enterprise, Genesys PureConnect or external systems with real-time raw data can be used.
