SECURITY SERVICES  
POWERED BY  
LARES

## PURPLE TEAMING

### THE BEST DEFENSE IS AN INFORMED DEFENSE

Purple Teaming takes the concept of Red Teaming one step further by creating a collaborative environment to simulate attacks, measure the efficacy of defenses, and rapidly iterate improvements to increase resiliency and defense.

#### Let Damovo Be Your Guide...

Damovo, together with our cybersecurity division Lares, can help your organisation validate its security posture through offensive security focused services such as collaborative effort purple teaming, table-top scenarios, defensive control analysis, defensive capability measurement and improvement, and complex adversarial simulations. We leverage our team of senior consultants to partner with businesses and prepare internal teams to measure the organisation's defensive maturity, and advance its security program. Each client is approached as an individual and we provide custom solutions that align with the organisation's program goals.

### PURPLE TEAMING OFFERINGS

**PURPLE TEAMING /  
COLLABORATIVE EFFORT**

**DEFENSIVE CONTROL ANALYSIS**

**DEFENSIVE CAPABILITY  
MEASUREMENT & IMPROVEMENT**

**TABLE-TOP SCENARIO &  
PLANNING**

**ADVERSARIAL SIMULATION**

### **Purple Teaming / Collaborative Effort**

Through collaboration, our engineers will leverage your existing infrastructure and technologies to produce high fidelity and actionable alerts based on the full attack chain and associated post-exploitation scenarios. Damovo will help ensure that system logging, detection, and alerting capabilities are appropriately configured by conducting real-world attacks used by advanced persistent threat actors.

### **Defensive Control Analysis**

Gain insight into the value of your currently deployed security products with Damovo. Our engineers can identify security coverage blind spots or redundancy by mapping your security controls to a range of compliance frameworks and industry best practices. In many cases, we can help uncover existing technical controls that satisfy security program requirements without additional investment.

### **Defensive Capability Measurement & Improvement**

Working with your staff to help benchmark its current maturity level, we can provide clear and actionable steps to incrementally increase security capabilities within the organisation. To minimise disruption within the business, Damovo will help your organisation implement positive, yet subtle, changes to your people, processes, and technology.

### **Table-Top Scenario & Planning**

We will work with your business to develop robust scenarios based on actual incidents that are relevant to your unique environment and industry. These table-top exercises and response plans help ensure that your organisation can close identified gaps and effectively address security incidents should they occur.

### **Adversarial Simulation**

Our highly experienced engineers will work collaboratively with your security team to perform real-world attack scenarios that emulate live attackers and ensuring cyber-security incidents don't go unnoticed.

## **About Damovo & Lares**

Lares is Damovo's cybersecurity division. All of the Lares engineers are required to meet a minimum baseline standard of eight years information security fieldwork before joining the team. Together we help companies secure electronic, physical, intellectual, and financial assets through a unique blend of assessment, testing, and coaching.
